DETAILED ACTION

Drawings

1. The drawings have been approved.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4 are rejected under 35 U.S.C. § 102(b) as being clearly anticipated by NASA Space Shuttle Program. The NASA Space Shuttle Program has launched numerous spacecraft into orbit with "advertisements" on them NASA, TRW, Delta, Boeing, etc. The NASA Space Shuttle Program has video cameras to view the satellites when launched and various crafts of all sizes and shapes and with solar panels and the space station will eventually be of 100's of meters long.

The two enclosed brochures show the shuttle used to launch various satellites with logos on them that advertise the company that made them that are in the business to make money from space, even NASA charges customers.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) or (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

5. Claims 5-11 are rejected under 35 U.S.C. § 103(a) as being unpatentable over NASA Space Shuttle Program in view of Forward or Piening.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to launch the satellites of Forward or Piening in the NASA Space Shuttle Program as it is another payload.
